

INVESTOR UPDATE
September 7, 2022

Dear Shareholder:

CONGRATULATIONS !

Today we start trading on the Canadian Stock Exchange (CSE) under the symbol RDRS.

Whilst it has been a long hard road for the past 18 months, riddled with many delays primarily due to COVID disruptions, the excellent news is that we finally crossed the finishing line, and as a public company we are now able to access the capital markets and grow our company. We successfully raised the \$3,000,000 that was necessary to fulfil our objectives and allow us to accomplish various milestones and catalysts before needing to raise additional funds. Over the next 12 months we anticipate that the commercialization and sales of our product will commence in a meaningful way.

Over the past 18 months, many positives have occurred, as disclosed in our Prospectus filed with the Ontario Securities Commission (accessible on www.sedar.com), the most principal to note is that in November 2021 we transitioned from a licensing arrangement with Easy Aerial to a full blown internal drone technology group with an inhouse engineering, production, and manufacturing capabilities. We now own all our technology, are free to sell into all residential, commercial, industrial, and military markets and have no restrictions to territories. We have the ability to customize our needs and create them in a more timely and cost effective manner. This will be crucial in our FAA certification process, where we no longer have to rely on third parties, but can execute ourselves.

Whilst this re-arrangement has also caused some delays, in addition to the COVID delays, I view this as short-term pain for long-term gain. In fact, the exciting news is that this month, in September, our production of the Eagle Eye, Eagle Nest, and Eagle Watch are already in production. We have set up in Toronto a small assembly plant to produce all the drones we need for the immediate future, starting with 20 units which will be deployed in locations for the testing requirements of FAA BVLOS waivers and certifications. This particular news is HUGE. We are now well on our way to achieving our goals.

I am extremely confident in our team of employees and associate companies that we deal with to execute on the plan and have never been more upbeat about the prospects at RDARS than I am today. We are currently in a great position, and more exciting times are ahead of us

I thank you for being a shareholder of our company and giving us the confidence of your investment.

Thank You

Charles Zwebner, CEO
